

Quality Assurance Provisions

This document defines quality systems requirements for those suppliers, vendors and subcontractors (hereinafter referred to as the “Seller”) providing materials, products and service to Comtech PST (hereinafter referred to as the “Buyer”).

1. QUALITY SYSTEM REQUIREMENTS

Seller shall establish and maintain its quality systems based upon ISO 9001, AS9100. Any other self-defined and documented quality systems are subject to review, audit, and acceptance by Comtech PST Corp.

2. WORKMANSHIP

Seller shall establish workmanship plans and acceptance standards in accordance with ANSI/J-STD-001 and IPC-A-610 to ensure the compliance of the performance and reliability requirements to the Buyer’s specifications.

3. CERTIFICATE OF CONFORMANCE

The Seller shall include a Certificate of Conformance with each shipment against the purchase order. The Seller shall ensure the person issuing the Certificate of Conformance is an authorized representative of the company. The exact format of the Certificate of Conformance may vary. Requirements can be identified within the Certificate of Conformance, Packing Slip, and/or material packing but shall contain the following minimum information:

- o Seller's name
- o Manufacturer's name (when different from the Seller)
- o Buyer’s part number as specified on the purchase order
- o Change notices shall be included if they are not part of the revision level
- o Serial Number (as applicable)
- o Date code (as applicable)
- o Lot/batch/heat number (as applicable)

4. MATERIAL REVIEW AUTHORITY

Material review authority shall not extend to “repair”, “as is”, “modification” or “alteration” for Seller published or customer specified requirements unless otherwise so authorized by the Buyer. If the Seller determines that a UAI or Repair disposition is needed, the Seller shall contact the Buyer for an Authorization to Ship or a Buyer Material Review Board disposition.

5. ELECTROSTATIC DEVICE PROTECTION

Electrostatic discharge sensitive (ESDS) device shall be stored, handled, packaged and shipped in such a manner as to preclude any damage from electrostatic discharge, and shall be in accordance of ANSI/ESD 20.20 and EIA JESD-625.

6. RIGHT OF ENTRY

Buyer, Buyer’s customer and cognizant government agencies shall have the right to visit the Seller’s facilities to perform source inspection of the products, witness manufacturing processes, inspections, tests and any related activities. This right shall also extend to the Seller’s subcontractors. The Seller shall be notified typically seventy-two (72) hours prior for such activities by the Buyer.

7. BUYERS SOURCE INSPECTION AND PROCESS VERIFICATION

Buyer's source inspection or process verification shall not in any way absolve the Seller's responsibilities to provide acceptable product nor shall it preclude subsequent rejection.

8. EQUIPMENT CALIBRATION

Test equipment and measuring devices shall be calibrated in accordance with ANSI/NCSL Z540 or ISO 10012.

9. OZONE DEPLETING SUBSTANCES

Seller shall ensure that all products that are not contained, be processed with and exposed to Class 1 ozone depleting substances.

10. SHELF LIFE CONTROLLED MATERIALS

Seller shall provide date code and recommended shelf life and storage environment as a minimum for all shelf life controlled materials.

11. ROHS COMPLIANT MATERIALS

Seller shall identify every component, part, sub-assembly and finished product that is in compliance with RoHS requirements. One of the following shall be stated on the certificate of compliance (C of C).

- JEDEC JESD201 Class 2 tin whisker tested – Tin plated part
- Tin whisker not tested – Tin plated part
- RoHS compliant – Any relevant part
- Lead free and surface finish other than tin

12. RECORDS

Seller shall establish a documented process and procedure to control and maintain all records for minimum of seven (10) years after the order completion. Records shall provide evidence of conformity to requirements and to the effective operation within the quality management system, and shall be available for review by the Buyer and regulatory authorities in accordance with contract and regulatory requirements unless otherwise indicated.

14. PACKAGING/HANDLING

The seller shall handle and package material in a manner that will assure protection against corrosion, oxidation, deterioration, Electrostatic Discharge (ESD) damage, Foreign Object Debris (FOD), and physical damage during shipment. Bulk packaging may only be used when the component lead integrity is maintained and material is protected against damage. ESD protective packaging shall be used for all electronic components.

15. SUPPLIER FLOW DOWN

The Seller shall flow down all applicable requirements of the purchase order to their suppliers and sub-tiers to ensure conformance with all specifications, drawings, quality systems requirements (i.e. ISO 9001, AS9100 or other), regulations, public laws and other requirements that may be specified in the purchase order

Quality Assurance Provisions

A Subsidiary of Comtech Telecommunications Corporation

16. CHANGES (Follow-on Procurements)

In the event the Seller anticipates changes to processes, products, or services from prior procurements the Seller shall notify Buyer of such changes, including changes of their external providers or location of manufacture. Seller shall obtain Buyer approval prior to change. Buyer approval, at its discretion, may include requalification or first article inspection.

17. ETHICS

Seller shall ensure persons are aware of their contribution to product or service conformity and safety and the importance of ethical behavior.

Note: In the event of any conflict, the requirements specified on the component or part specification/drawing or elsewhere on the purchase order take precedence over this document.
